[git/nakulchauhan](https://git.com/nakulchauhan)

Summary

AI Engineer skilled in Python, Web Development, Deep Learning, Machine Learning, Data Analytics, Power BI, and MongoDB. Experienced in building AI-powered solutions, developing predictive models, processing real-world datasets, and implementing end-to-end data pipelines. Strong understanding of NoSQL, Big Data concepts, and model development.

Technical Skills

- **Programming & Libraries:** Python (Pandas, NumPy, Matplotlib, Seaborn), Java, SQL, JavaScript (React, Next.js, Angular, Vite)
- **Artificial Intelligence (AI):** Machine Learning, Deep Learning, Generative AI, Responsible AI, AI Automation, Data Analysis
- **Data Tools:** Power BI, Microsoft Excel, MongoDB, Firebase, Supabase

Internship Experience

Full-Stack Website Development

City Hulchul | Oct 2025

- Built the first City Hulchul website from scratch as a complete full-stack platform.
- Developed the frontend, backend, and database systems for a smooth and scalable experience.

Google Cloud Generative AI – Virtual Internship

Google Cloud | Remote — Sep 2024

- Learned core concepts of Generative AI using Google Cloud tools and LLMs.
- Completed hands-on labs and mini-projects focused on AI-driven applications.

Artificial Intelligence Virtual Internship

Code Alpha | Remote — April 2025

- Worked on AI projects involving model building and data preprocessing.
- Gained practical experience with Python and machine learning libraries.

Projects

- **Music Generation using Deep Learning** – Built a simple music generation model with **RNNs** and **GANs** in Python to create original musical sequences, showcasing **applications of AI** in creative arts.
- **AI-Powered FinTech SaaS Platform** – Developed an intelligent banking system integrating loan prediction, risk assessment, real-time interest optimization, fraud detection, and SaaS-based revenue analytics using machine learning and explainable AI.
- **Signature Verification System** – Built an AI-based signature verification project using image processing and machine learning to authenticate handwritten signatures and detect forgeries with high accuracy.
- **Stock Price Prediction using RNN** – Developed a RNN model to forecast stock trends using historical market data.
- **Movie Data Analysis** – Conducted exploratory data analysis on **Netflix dataset** using **Python, Pandas, Matplotlib, and Seaborn** to uncover trends in content production, genres, and viewer preferences.
- **Travel Buddy** – Developed a travel planner app that recommends destinations, optimizes travel routes, and provides AI-based suggestions based on user preferences.
- **COVID-19 Dashboard in Power BI** – Built an interactive dashboard using Worldometer data to visualize cases, recoveries, fatalities, and key trends across waves.

Education

Meerut Institute of Engineering and Technology, Meerut

2022-till date

Bachelor of Technology Computer Science (AI)

Dewan Public School, Meerut

Senior Secondary

2022

High School

2020

Certifications

- **Oracle Cloud Infrastructure 2025 AI Foundations Associate (1Z0-1122-25)** – Oracle, Aug 2025
- **Career Essentials in Generative AI** – Microsoft & LinkedIn, May 2025
- **Data Analytics Job Simulation** – Deloitte Australia, May 2025
- **Microsoft Excel for Data Analyst** – Infosys, April 2025
- **Power BI** – ISO 9001, July 21, 2025
- **SQL Project for Beginners** – Great Learning, Sep 2024
- **Getting Started with Java: The Fundamentals of Java Programming** – Infosys, Sep 17, 2024

Hackathons

GDG Hackathon

- Built a travel planner app that recommends destinations and plans optimized routes using user preferences and AI suggestions.

MLSA Hackathon

- Designed a banking analytics solution that helps banks make financial decisions using automated AI-driven insights.
